Concept

A frictionless magnetic bearing tonearm is responsible for the optimal performance of the cartridges. All critical parameters from cartridge tracking weight to anti-skating are preadjusted in our factory. The concept represents the ideal of stress-free 'plug and play': „unpack, connect, put the record on the platter – and just enjoy music.“ There was never more audiophile technology in this class of turntables.

Performance DC

A DC motor with high precision bearings and flat belt-drive, in conjunction with a platter of 40mm thick POM which rests on a Clearaudio ceramic magnetic bearing (CMB), provide optimal conditions for the correct sampling of the record groove. The elegant and simple appearance of the Performance DC with its clear lines matches its excellent audio performance. (Turntable without tonearm and cartridge).

Reference Jubilee

40 years Clearaudio - this needs to be celebrated with a special limited turntable (only 250 units)!

We created the symbioses of one of the first Clearaudio Reference turntable designs and melting it together with the materials and technology from today, new motor, new resonance technology and super silent motor control board.

The scope of delivery of the Reference Jubilee turntable already includes the new Professional Power 24V power supply unit.

Master Innovation

Dynamically balanced main platter is a sandwich construction of 70mm (2 ¾ inch) of high-density polymer upon a 15 mm (4/5 inch) precision turned stainless steel subplatter. This floats in free space within the resonance-reducing chassis structure in a Clearaudio patented Ceramic Magnetic Bearing (CMB). Below the CMB is a Clearaudio no-contact drive system derived from the flagship Statement turntable. To allow complete flexibility the Master Innovation will accommodate up to three tonearms (Turntable without tonearm and cartridge).

Balance Reference Phono

Tillgänglig 3:e kvartalet 2022

The new balance reference phono was developed especially for the phono enthusiast, featuring completely independent phono inputs for connecting moving coil and moving magnet phono cartridges. The sophisticated volume and input circuitry are accessible with the supplied remote control. The high-performance design provides 2 headphone connections.

Art. No.	Version	Rek.Pris ink Moms
EL038/B	Black	106.000kr
EL038/S	Silver	106.000kr

absolute phono / absolute phono inside

The Clearaudio absolute phono is the world's first active headshell moving coil phonostage. A tiny circuit board installed in the headshell of the tonearm amplifies the highly sensitive moving coil cartridge signal at its source. As a result, the signal to noise ratio is improved by approximately ten decibels across the entire audio bandwidth.

The cost of the configuration of your existing or new purchased Clearaudio tonearm is already included.

Art. No.	Version	Rek.Pris ink Moms
EL029/BB	Black with black chassis	165.000kr

EL024/230		9.500kr

Azimuth optimizer

High precision measuring device enables accurate adjustment of the cartridge azimuth: the vertical orientation of the stylus in the groove. Build-in phonostage and headphone amplifier enables mobile use.

Includes Azimuth Optimizer Test Record (Art. No. LPT Azimuth 080108) 100-240V, 47-63Hz

Art. No.	Version	Rek.Pris ink Moms
EL020	Silver	54.000kr

smart power 12V

The smart power 12V is a battery-based DC power supply upgrade designed for Clearaudio's concept, concept active and Performance DC turntables. Like the smart power 24V, it provides clean power that is independent of the variability and inherent noise of the mains supply. With a minimal output impedance, it delivers a steady, stable voltage, allowing your concept or Performance DC turntable to maintain perfect speed stability. Again, like the 24V version, the smart power 12V can be set to switch automatically from battery play mode into recharging mode and will continue to enhance your turntable's performance and protect it from short circuits and power surges, even while charging.

When used with the concept active turntable, the smart power's (12V) benefits are multiplied, since both the turntable's motor and the on-board phonostage are fed with pure, clean DC power.

Art. No.	Version	Rek.Pris ink Moms
EL035/B/S	Black with silver chassis	11.500kr
EL035/B/B	Black with black chassis	11.500kr

Smart power 24V för Ovation & Innovation drivverk

The smart power 24V is a battery-based DC power supply upgrade, designed to unleash more of the considerable potential of Clearaudio's high-performance Ovation, Innovation and Statement turntables. It partners intelligent circuit technology with long-lasting NiMH (nickel-metal hydride) rechargeable batteries to deliver 24V of pure, clean, fluctuation-free power. The smart power 24V can be set to switch automatically from battery play mode into recharging mode if desired. Even when recharging, it continues to offer an improvement in sound quality as well as adding safety features such as protection against short circuits and overvoltage. Its elegant, low-key design includes a dimmable LCD display.

Art. No.	Version	Rek.Pris ink Moms
EL034/B	Black	36.500kr
EL034/S	Silver	36.500kr

Smart power 24V för Statement drivverk

For this special version, the proven technology of the smart power 24V has been adapted to the sophisticated technology of the Statement turntable (Not suitable for 78rpm).

EL036/B	Black	41.500kr
EL036/S	Silver	41.500kr

Professional Power 24V

The Professional Power 24V is a high quality transformer-based and stabilized 24 Volt DC power supply. It is designed to fill the gap between the standard power supply that comes with our turntables and our state-of-the-art, auto-charging smart power 24V battery supply.

The Professional Power 24V provides improved filtering over the standard power supply, which delivers a much cleaner power source. Cleaner power and increased 'headroom' for Clearaudio's Innovation and Ovation series turntables, thanks to a smoother motor performance and extended reserves. The resulting improvements in sound quality are significant.

The unit's construction features professional-grade electronic components and a resonance-optimized transformer to ensure that no mechanical interference will be transferred through the housing.
